Video can be a powerful way to spread a message in a way that is easily accessible to a large audience.

Plus! Customers are more likely to use you when they understand what you do and how it will help them. So … we have created a video for you to use in your marketing and sales efforts. See page 10 for details. Don’t forget to check out our Video Library and our YouTube Channel!

At the time of writing this letter, UFO proudly contains 110 hand-picked members in 101 countries. We are emerging from a difficult few years and it’s important now (more than ever) to belong to a strong growing network like UFO … and even more important that you attend our 20th Network Meeting in Abu Dhabi!

It is set to be a large networking event and even though it is several months away, we are processing new registrations every week.

With the 2022 FIFA World Cup close by in Qatar, we are making our meeting even more fun! For the duration of our event, you will be able to challenge your fellow UFO Members to a game of table football or pool. Our specially hired tables will be found in our coffee break area, and we hope they will provide some amusement during our conference.

For now, have a wonderful July and enjoy this issue.

UFO HOLDS EXCLUSIVE WEBINAR FOR THEIR MEMBERS

Universal Freight Organisation (UFO) recently held an exclusive Webinar for their Members with Marco J. van Daal, a lecturer/speaker who has over 20 years’ experience extending to more than 55 countries on 5 continents.

Marco is author of the book ‘The Art of Heavy Transport’ and in addition to being a contributing member of the American Society of Mechanical Engineers (ASME) and the European Association of Abnormal Road Transport and Mobile Crane (ESTA). Marco also delivered the training for UFO’s eLearning Platform.

Fully funded by the Head Office, the Interactive Webinar was provided free for Members and featured an interesting case study of a power plant that planned an extension and went from 12 x 180 ton gensets to 6 x 300 ton.

The fascinating case study showed how late changes in a project design can have a major influence on equipment selection and sourcing. Not to mention schedule overruns and all the associated cost. A perfect example that the heavy transport provider (or crane provider) should be involved from the early stages of the project.

The session took place on 2 May 2022 and was recorded for Members who were unable to participate due to varying time zones.

UFO President, Rachel Crawford said:

“The fascinating case study showed that forwarders really are the world’s greatest problem solvers! It also highlighted the vast amount of factors that go into the planning and execution of such projects.”

“Marco’s presentation included the perfect mix of videos, photos and diagrams which he explained in great detail. It really was a fantastic webinar and showcases the huge wealth of knowledge Marco has gained in his 20+ years in the industry.”
